❻Capacitance

Expressed by three-digit alphanumerics. The unit is picofarad (pF). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two numbers. If there is a decimal point, it is letter "**R**." In this case, all figures are significant digits. expressed by the capital If any alphabet, other than "**R**", is included, this indicates the specific part number is a non-standard part.
