

CPT-7 FULLY AUTOMATIC WINDING MACHINE/CPT-7全自动绕线机

Parameters 技术参数

设备型号/Model#	CPT-7
绕线模式/Winding Mechanism	Hook winding Mode
铜线直径/Wire diameter	0.5~2.5mm
铜线长度/Wire length	100~1400mm
磁芯尺寸/Core dims	OD 12~40mm ID after finish winding ≥3mm
绕线速度/Winding speed	0.8~1.2s/T (取决于线径和绕线圈数)
绕线种类/Winding mode	Single wire/common mode inductor/Differential-Mode Inductor
电源/Power supply	AC 220V 50Hz
设备尺寸/Machine dims	L1350 x W1200 x H1800
总功率/Power	2200W
额定功率/Rated power	600W
重量/Weight	200Kg

- The machine was specially developed for thick wires with uniform coil arrangement, tight winding, low electromagnetic leakage inductance, accurate number of coils wound, and stable product quality.
- Hook style pulling wire structure, two winding workingstation, it windings 2 choks at the same time.
- The unique dual parallel core clamping mechanism can complete common mode winding in one workstation.
